

SMARTPHONE- APP

CALL CAR LIFT CONVENIENTLY & CONTACTLESSLY VIA SMARTPHONE

Thanks to the integration of a third-party smartphone app, users can conveniently call car lifts via their smartphone and operate them contactlessly. User management in the app solution makes it possible to define and manage user groups and flexibly control access authorisations, saving valuable time and money.

TECHNOLOGY IN MOTION

SMARTPHONE APP CONTROL FOR CAR LIFTS

Car lift control at the swipe of the smartphone

Parking has never been so easy: thanks to the integrated app solution, users can conveniently call lifts via smartphone without the need for an additional remote control. This solution offers convenient access, high safety standards and

standards and user-friendly management for controlling access authorisations. The app solution is compatible with all types of car lifts and can also be used to retrofit existing Lödige car lifts.

As a completely Bluetooth-based system, the third-party app solution works independently of any internet connections. This not only prevents unwanted data access from outside, but also ensures independence from signal interference. The Bluetooth connection enables flawless connectivity even in underground car parks. Ranges of up to 30 metres from the lift doors are possible with the app.

THE SMART APP FOR YOUR MOBILE

BENEFITS FOR CAR LIFT USERS:

Easy handling

Car lift users benefit from the simple and intuitive handling based on typical smartphone usage patterns.

Safer operation

The personal smartphone use removes the need for any touch contact with lift controls, eradicating the risk of infection transmission. Leaving the car in front of the lift is also not required.

Intuitive user experience

Car lift users will appreciate the easy and convenient use and the smooth and enjoyable interaction with the lift via the app.

BENEFITS FOR BUILDING OWNERS & MANAGERS:

Easy to activate

The required hardware is added by our team during installation or retrofit and the initial account creation is easy and straightforward.

Complete access control

An integrated easy-to-use administration tool makes it simple for building owners or operators to add and manage up to 1000 users and restrict or grant access to certain times or user groups remotely.

Intelligent security

Access data can be collected and retained if desired, giving operators a secure and intelligent entrance control as well access data in case of damage or theft.

HOW THE CAR LIFT APP WORKS:

FOR USERS:

1. Download and Register

Download the app, register with your email, and confirm. Once invited by the owner, you'll gain access to the car lift.

2. Start Using the App

Simply open the app to call the car lift and enjoy easy access to your parking.

FOR OWNERS AND BUILDING MANAGERS:

1. Account Creation

Once you're set up, you'll receive a welcome email at your designated email address with a link to download the app. Open the app and confirm ownership by entering your email address.

2. Hardware Installation

Our team will handle the on-site installation of the necessary hardware for seamless operation.

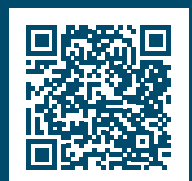

3. Account Management

After setup, we'll hand over control, allowing you to easily manage user and administrative access. You can add, remove, or restrict administrators, users, or user groups anytime.

We will be happy to support you throughout the entire planning, installation and operating phase of your lift solution: Whether it is a new building, an existing building or a renovation - we look forward to hearing from you.

Let's start a new project together!
